Citizenship: Singapore Permanent Resident

SUMMARY

Computer Science graduate with experience developing web and mobile applications through university projects using React, TypeScript, JavaScript, Node.js, and Express.js. Familiar with frontend development, backend API integration, and application testing. Enjoy solving technical problems and building practical software solutions that improve user experience. Currently seeking an opportunity to grow as a Junior Software Engineer while contributing to real-world projects.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++
Frontend: React.js, React Native, HTML, CSS
Backend & API: Node.js, Express.js, REST API
Tools: Git, Postman, Jest, Vercel

EDUCATION

Bachelor of Science in Computer Science
Singapore Institute of Management (University of London) October 2023 - October 2026

Diploma in Information Technology
INTI International University April 2019 – June 2021

UNIVERSITY PROJECTS

Personal Portfolio Website Project
Github: https://github.com/WeiSheng0429/WS-Website
Technologies: HTML, JavaScript, CSS, Vercel

- Designed and developed a simple personal portfolio website
- Created responsive web pages with a focus on clean layout, usability, and user experience.
- Deployed the website using Vercel and managed project version control through GitHub.

NextTrack | Session-Based Music Recommendation Web Application

Github: https://github.com/WeiSheng0429/CM3070_NextTrack
Technologies: React, TypeScript, HTML, CSS, Node.js, Express.js

- Developed a music recommendation web application that suggests songs based on the current session without requiring an account or storing listening history.
- Developed the frontend with React and TypeScript and built a backend REST API using Node.js and Express.js.

SGCharge | EV Charging Station Finder Mobile Application
Github: https://github.com/WeiSheng0429/cm3050_SGCharge
Technologies: React Native, Expo, JavaScript, REST APIs, LTA DataMall API, Geolocation

- Developed a cross-platform mobile application using Expo and React Native to help electric vehicle (EV) users in Singapore locate and explore nearby charging stations in real time.
- Integrated the Land Transport Authority (LTA) DataMall EV Charging Points API alongside device geolocation services to provide accurate, location-based charger discovery, details, and connector compatibility.
- Implemented a user-friendly mobile interface featuring interactive search, station detail's view, and a simulated wallet system to streamline charging-related activities.

EXPERIENCE

IT Engineering Intern | Fonda Global Engineering Pte Ltd June 2020 - August 2020

- Monitor CCTV cameras within HDB car parks
- Assist Engineer to troubleshoot CCTV system
- Assist government agencies in case investigations

Event Assistant | Fotorex Holding Sdn Bhd July 2019 – August 2019

- Set up promotional booths and product displays
- Disseminate product samples, brochures, and flyers
- Assist customers in finding suitable products

Event Assistant | Hean Lee Radio Service Pte Ltd July 2024 – Aug 2024

- Promoted products to customers during events
- Answered customer enquiries and assisted with product promotion
